

A man in green scrubs and glasses is working on a wax mannequin lying on a table. He is holding a blue cloth. The setting appears to be a clinical or educational environment, with a yellow and blue LSU (Lifeguarding Support Unit) device on the wall to the left. The man is focused on his work, and the mannequin has some red wax applied to its chest area. The background shows a white wall with various notices and a fire extinguisher.

Moulage

The art of wax sculpting

Purpose of moulage

- Used to create realistic-looking injuries, illnesses, or diseases to simulate real-world scenarios for training purposes.

Kits

Kits can range from paint, wax, and make up, to plastic or rubber strap-on wounds.

Moulage

Chaos and
imagination

Benefits

- Helps learners develop critical thinking and critical reasoning skills promoting confidence in handling real life scenarios.
